

# Automating the Digital World

Pliant, one of the fastest-growing automation platforms is teaming up with Accedian to provide customers with immediate visibility from the Accedian SkyLIGHT solution. **Pliant's powerful automation platform**, combined with **Accedian's SkyLIGHT Director solution**, enables customers to drive network test adoption and quickly maximize their investment in Accedian.

Provisioning synthetic tests within a network manually can take time and resources which are always a scarce commodity. Pliant's automation of the Accedian SkyLIGHT Director platform provides customers a robust and simple way to automate the deployment of synthetic tests no matter how large the network.

## Novel Approach

Pliant's out of the box curated workflows speed deployment and ensure the accuracy of testing giving you important visibility quicker than if provisioned manually. The automation Pliant provides, decreases the operational and engineering resources needed to maintain this crucial visibility in a constantly changing network environment. By leveraging SkyLIGHT's commercially available APIs, Pliant is able to provide the ability to create, update, and delete tests all in an automated fashion.

## Take Full Advantage

Using Pliant's workflows, customers can provision 1000's of tests in the network in minutes, getting valuable performance data into the hands of those who need it via the Accedian SkyLIGHT Platform. Teams can also leverage Pliant's platform to build intelligent infrastructure workflows to address multiple different use cases across multiple domains. Centralizing and consolidating management for all Accedian deployments in your organization. Additionally, Pliant's workflows can be stored and versioned in a GIT repository.

Pliant is the only platform to create new or leverage existing automation under centralized governance and delivers a unified interface that interacts with all the systems powering your infrastructure. The platform enables enterprises to build IT process automation without the usual constraints of incompatible code libraries, underlying protocols and syntactical issues associated with scripting languages.

## Some of the Key Features / Benefits of this Solution

FEATURES	BENEFITS
Out of the box curated workflows	Faster deployment of tests / quicker visibility
Single point API enforcement	Secure collaboration for multiple teams
Centralized Management of Accedian Workflows	Collaboration - Centralize the building of workflows enabling both operations and engineering to interact with provisioning and maintenance of tests
Dynamically update workflows	Visibility stays current in a dynamically changing network environment
Pliant's workflow engine builds complex network-wide workflows	Increase Speed and Efficiency - Develop a single parameterized workflow to deploy thousands of tests in minutes with 100% accuracy.
Closed-loop orchestration	Ensures accurate deployment and operation of tests throughout the network
Role-Based Access	Allow users to provision, change or delete tests based on role

### Immediate Value

Pliant automation coupled with the Accedian SkyLIGHT director enables customers to realize immediate value from performance data which is derived from the provisioning of 1000's of tests across a complex network in minutes rather than hours or days. Pliant automation also enables the continuity of this performance data in a rapidly changing network environment managed by engineering and operations teams.

Pliant believes moving at the speed of digital business requires a fundamental change in how companies deploy and manage technology. A rapidly changing and complex infrastructure demands a platform that provides initial automation of provisioning and reduction of human error as well as ensures compliance and automate real-time mitigation of issues. Pliant's unified platform for IT process automation simplifies how ITOps, DevOps and SecOps teams can quickly develop and deploy workflow automation in response to the demands of complex IT processes. By transforming API code into low-code building blocks, Pliant is able to **Automate, Secure and Transform** all of your business' digital processes.
